ABB

Making you more competitive

ABB has been manufacturing motors for over 100 years. Our products are designed to be reliable, efficient and cost effective, and we can supply motors for practically any application. A full range of services is available through our worldwide service organization, with the latest eBusiness systems providing round-the-clock access, easy ordering and fast delivery.

Industrial^{IT}

As a key element of its business strategy, ABB has committed to a broad program of product development and positioning under the Industrial^{IT} umbrella. This initiative is geared towards increasing standardization of ABB products as the 'building blocks' of larger solutions, while incorporating functionality that will allow multiple products to interact seamlessly as components of real-time automation and information systems. Motors and generators represent one of the fundamental building blocks in the Industrial^{IT} architecture.

ABB (www.abb.com) is a leader in power and automation technologies that enable utility and industry customers to improve performance while lowering environmental impacts. The ABB Group of companies operates in around 100 countries and employs around 120,000 people.

General Purpose Motors

ABB's General purpose motors are readily available from central stock locations and distributors throughout the world. While designed for standard and straightforward uses, the motors can be modified to meet most specifications. Built to the highest manufacturing standards, the General purpose motors use the best materials sourced from around the world. This brings a quality and reliability that can see motors operating for over 30 years. Competitively priced, the motors meet EFF2 energy efficient classification, with EFF1 as option.

Process Performance Motors

ABB's Process performance motor is engineered to meet the most demanding applications found in industries including pulp and paper, water treatment, food and beverage, metals and building materials. Such is the high design specification of the motor, when used in conjunction with applications in these industries, ABB is able to provide a 3-year warranty.

Built to the highest manufacturing standards, the process performance motors use the best materials sourced from around the world. This brings a quality and reliability that can see motors operating for over 30 years. Competitively priced, the motors meet EFF1 energy efficient classification.

Availability

Through our extended support and services such as an efficient global stock concept, we provide you with easy ordering and quick delivery.

- EDI based ordering
- Over 300,000 motors stocked worldwide
- Most frequently used OEM motors stocked in depth
- 2 to 72 hours delivery for stocked motors
- Modifications within 24 hours

BusinessOnline

BusinessOnline, at <http://online.abb.com/motors> gives you real-time, on-line access to your own personal portal to ABB motors and drives. You can choose, configure and order products, determine their availability and stock levels, follow their progress through the order-processing and delivery chains, and access a wealth of support services and technical information such as drawings, test results and technical documentation.

Ordering information

Sample order

When placing an order, please state the following minimum data in the order, as in the example.

The product code of the motor is composed in accordance with the following example.

Motor type	M3AA 112 MA
Pole number	4
Mounting arrangement (IM-code)	IM B3 (IM 1001)
Rated output	3 kW
Product code	3GAA 112021-ADA

Certain variant codes cannot be used together.

Note! This list is an extract of a wide range of possible modifications. Please see the General Purpose or Process Performance Motor Catalogue for a complete list of variant codes.

S = Included as standard.

M = On modification of a stocked motor, or on new manufacture, the number per order may be limited.

P = New manufacture only.

R = On request.

NA= Not applicable.

¹⁾ Temperature rise class F

²⁾ Efficiency class 2.

³⁾ -3dB(A) sound pressure level reduction with unidirectional fan construction. Direction of rotation must be stated when ordering, see variant codes 044 and 045.

⁴⁾ Unidirectional fan construction as standard. Direction of rotation must be stated when ordering, see variant codes 044 and 045.

⁵⁾ When ordering, the following variant code has to be added to the product code: 199 = Extreme heavy duty design. Type designation M3AP.

Efficiency classes fixed for ranges 1.1 to 90 kW
(available only by 2- and 4-poles).

1) Temperature rise class F

2) Efficiency class 2.

3) When ordering, the following variant code has to be added to the product code: 199 = Extreme heavy duty design. Type designation M3AP.

Efficiency classes fixed for ranges 1.1 to 90 kW (available only by 2- and 4-poles).

Process performance cast iron and aluminum motors

Technical data for totally enclosed squirrel cage three phase motors

IP 55, IC 411; Insulation class F, temperature rise class B

Certain variant codes cannot be used together.

Note! This list is an extract of a wide range of possible modifications. Please see the General Purpose or Process Performance Motor Catalogue for a complete list of variant codes.

S = Included as standard.

M = On modification of a stocked motor, or on new manufacture, the number per order may be limited.

P = New manufacture only.

R = On request.

NA = Not applicable.

ABB Motors' total product offer

ABB offers several comprehensive ranges of AC motors and generators. We manufacture synchronous motors for even the most demanding applications, and a full range of low and high voltage induction motors. Our in-depth knowledge of virtually every type of industrial processing ensures we always specify the best solution for your needs.

Low voltage motors and generators

General purpose motors for standard applications

- Aluminum motors
- Steel motors
- Cast iron motors
- Open drip proof motors
- Brake motors
- Single phase motors
- Integral motors

Process performance motors for more demanding applications

- Aluminum motors
- Cast iron motors

Other applications

- Motors for hazardous areas
- Marine motors
- Permanent magnet motors
- High speed motors
- Wind turbine generators
- NEMA motors
- Water cooled motors
- Motors for roller table drives
- Slip ring motors
- Wood dryer motors
- Fan application motors

High voltage and synchronous motors and generators

- High voltage cast iron motors
- Induction modular motors
- Slip ring motors
- Motors for hazardous areas
- Servomotors
- Synchronous motors and generators
- DC motors and generators
